Week Six Status
10/21/2022
TEAM RAD
Real-time Anomaly Detection

Progress Update

Gavin Cutchin
Gabby Rivera
Kinesis:
- **Accomplishments -** Setup a mock data stream on AWS kinesis, set up a mock Firehose too.
- **Next steps -** Migrate the current system to a IDE environment so it can be uploaded to Git.
- **Questions -** What format should the mock data look like? What type of data should we expect to format (JSON format).
    - **Answer:** Match training models of data

Jared Dunn

SageMaker:
- **Accomplishments -** Set up SageMaker account and connected github to amazon Sagemaker using notebook instance
- **Next steps -** Add BETH data to our git repository
  update features to better suit the data we will be looking at for our project.

Overall:
- Joint AWS account between all members.
- Look at alternatives to SageMaker (1 member) - model training outside of AWS
    - Google Collab
